

Skull Studio

PDF / PPTX -> interactive animated HTML

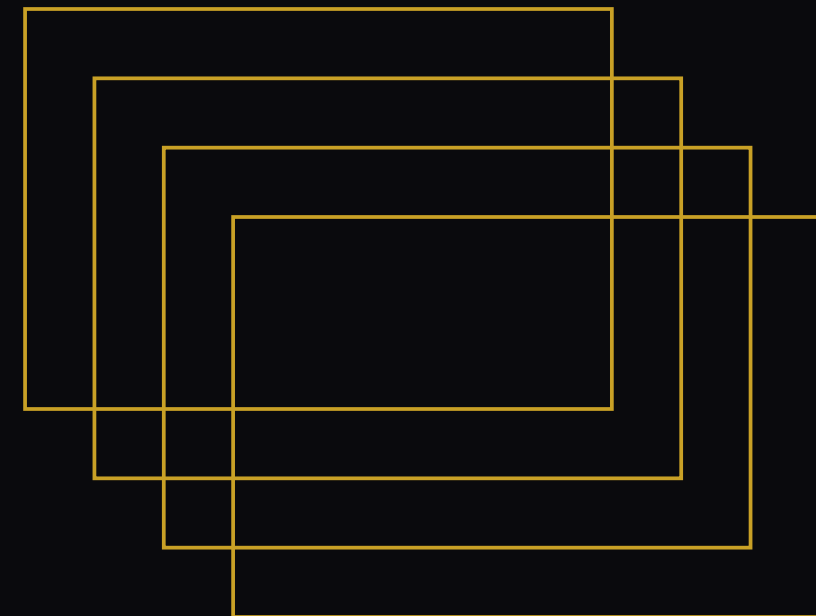

- *Import a slide deck*
- *Auto-segment text & images*
- *Animate, rig, and export*

Layered, animated slides

Every element is independent

- *Entrances: fade, slide, scale, reveal*
- *Idle loops: breathe, float, sway*
- *Mouse parallax depth*

Mesh & 2D-bone rigging

Puppet-warp without a GPU pipeline

- *Pin an image, keyframe a loop*
- *Bone chains follow their parent*
- *Bake to looping video or GIF*

Export anywhere

One project, many outputs

- *Self-contained HTML*
- *Editable PowerPoint (.pptx)*
- *No-WebGL baked HTML*
